Business process outsourcing (BPO) is a business practice in which an organization contracts with an external service provider to perform an essential business function or task. Regulating the Outsourced employees is processed via communication between the admin and employee by possibly the aspects like work to be done which is assigned, editing employee details, any kind of issues dealt by the employee is processed by admin. The employee performs the functionalities assigned and in case of issues, can be raised which can be viewed from the end of admin.
